## Internal

# Joint Seals

Internal seals allow for fast installation and immediate results. Seals will help prevent leak-ages due to pipe damage. Every seal is expanded, re-expanded, and air tested. Internal seals will provide a bottle tight seal and prevent infiltration or ex-filtration on existing pipelines. Seals are able to accommodate a variety of pipe configurations and shapes.

- 18" - 200" Installs
- Non-Corrosible
- Cost-Effective
- Maintenance Free
- Internal Sleeves
- Leak Proof
